

EQACC SOLAR

100MW solar glass

Overview

What is a 100MW solar module line?

A 100MW solar module line is an automatic production line made up of quality individual equipment, like glass loading equipment, stringer machine, layup machine and laminators, to reduce manual cost to the maximum. The production line is also equipped with a MES system for production data monitoring to benefit the stable and reliable production.

What is the working noise of a 100MW solar module line?

Working noise: $\leq 70\text{dB(A)}$. A 100MW solar module line is an automatic production line made up of quality individual equipment, like glass loading equipment, stringer machine, layup machine and laminators, to reduce manual cost to the maximum.

What is the biggest solar cell?

The biggest solar cell is M12 (210mm). And the cycle time is within 20 seconds. Automatic Glass Loading Machine An automatic glass loading machine works to supply glass rapidly by automatically load, position and transport glass. EVA Cutting & Layup An EVA cutting & layup machine can directly mix tailings with new materials through hot melting.
