100W Energy Saving Solar Street Light

Overview

How does a 100W LED solar street light function?

Our 100W LED solar street light works by switching on at dusk and off at dawn automatically. It is also integrated with a motion sensor detector that changes the brightness to 100% when detecting people and keeps it at 50% otherwise.

What is an 100 watt solar street light?

An 100W solar street light is an energy-efficient and eco-friendly lighting solution designed for outdoor use. This 100 watt solar street light harnesses solar energy through high-efficiency photovoltaic panels, converting sunlight into electricity to power its high-lumen LED lights.

How can I save energy with LED streetlights?

Shed some light on potential savings. The ComEd Energy Efficiency Program offers incentives for energy-saving LEDs, including fixture replacements and retrofits, municipally owned streetlights, and networked lighting sensors and controls. Eligible products are also available from lighting distributors throughout the ComEd service territory.

What is a 100W street light?

Ideal for streets, parking lots, pathways, and public spaces, the 100W street light features a robust design with weather-resistant materials, ensuring durability and long-lasting performance. It typically includes a built-in battery for energy storage, allowing it to provide consistent illumination even during cloudy days or nighttime.
