

**EQACC SOLAR**

# **100kWh Solar Containerized Containerized Power Supply for Train Stations in Antananarivo**

## Overview

---

What is a 100kW PCs and 200kwh batteries energy storage system?

This is a 100kW PCS and 200kWh batteries energy storage system. Working with our EMS (energy management system), batteries can be charged by surplus solar generation and discharge to local load when generation is insufficient to optimize self-consumption.

Can railway PV supply power to the HSR?

The lowest daily PV generation is 1334 MWh, which still covers 60% of the electricity consumption. These results indicate the high potential of the railway PV system to supply power to the HSR and show that the railway system is not highly reliant on the storage system, which undoubtedly cuts the system costs.

How BS-HSR's electricity demand was covered by the railway PV system?

The PV system provided power to the railway system from 5 a.m. to 7 p.m. The railway PV systems were able to cover BS-HSR's electricity demand before 6 p.m. The local railway PV generation satisfied 93.4% of the electricity demand in Jiangsu without the assistance of energy storage devices.

Can a railway PV system supply electricity to a bullet train?

Same as the situation in Jiangsu, the railway PV system in Shandong can supply electricity to bullet trains during the daytime; after 6 p.m., the railway system needs to import electricity either from storage systems or the utility power grid. Fig. 8.

## 100kWh Solar Containerized Containerized Power Supply for Train S

---

### Sunpal All in One Battery Container 100kwh Battery Energy ...

50kw+100kwh Containerized Battery Solar Power Storage Plants are suitable for use in public buildings, communities, medium and large enterprises, utility-scale storage ...
