10MW Australian Energy Storage Container for Airports

Overview

Why should you choose a container energy storage system?

Housed in durable shipping containers, our systems are engineered to meet the growing demand for renewable integration, backup power, and off-grid energy supply. Why Choose a Container Energy Storage System?

All-in-One Power Solution – Integrated battery storage, inverter systems, and control units in one secure container.

What is the Big Battery Storage Map of Australia?

The Big Battery Storage Map of Australia is a map that includes all big battery projects of 10MW or 10MWh and above. It categorizes projects as 'Operating', 'Construction', 'Announced', or 'Under Development'.

How can Bess help airports achieve net-zero sustainability goals?

With BESS, airports can reduce their carbon footprint, improve energy efficiency, and meet regulatory requirements while advancing toward net-zero sustainability goals. Amsterdam Schiphol Airport has deployed BESS to enhance grid resilience, reduce energy costs, and support EV charging infrastructure.

Do airports need a backup power source?

Traditional backup power sources, such as diesel generators, come with high operational costs, emissions, and slow response times, making them an inefficient long-term solution. Airports consume vast amounts of electricity for runway lighting, security systems, passenger services, and baggage handling.
