

**EQACC SOLAR**

# **10MW Energy Storage Container for Environmental Protection Project**

## Overview

---

How many MWh of energy storage does GE have?

To date GE has more than 207 MWh of energy storage in operation or in construction globally. This project will relieve pressure on the host country's energy system and provide flexibility when it is most needed to deliver a more balanced, secure energy system and help reduce consumer energy cost.

What is a 33MW / 20mwh battery system?

Located in California, which has some of the most aggressive renewable portfolio requirements in the US, this 33MW / 20MWh battery system complements the integration of renewable resources, such as solar and wind, by adding stability and improving power quality.

What is energy storage & how does it work?

Energy storage supports diverse applications including firming renewable production, stabilizing the electrical grid, controlling energy flow, optimizing asset operation and creating new revenue by delivering: Monetize assets through new revenue streams, increased asset utilization, improved yield, and reduced operating costs.

## 10MW Energy Storage Container for Environmental Protection Project

---

### Over 6GWh! A Comprehensive Summary of China's Energy Storage ...

Since November, China's energy storage sector has witnessed the concentrated announcement of bid results for numerous projects across the country. Centralized ...
