

EQACC SOLAR

10MW photovoltaic containerized system used in Tunis city hospital

Overview

What is a photovoltaic power plant in Tunisia?

In Tataouine, in the governorate of Tunisia that goes by the same name, a photovoltaic power plant is in operation that can reach a maximum installed capacity of 10 MW to supply more than 20 GWh of energy per year to the national grid. The plant is equipped with a solar tracking system that optimises the energy that is produced.

What are the applications of solar energy in Tunisia?

The applications of solar energy in Tunisia are diverse. Solar PV systems are increasingly installed in residential, commercial, and industrial settings to generate electricity. Large-scale solar farms, such as the Tozeur photovoltaic plant, feed into the national grid, enhancing energy availability.

Are solar panels a viable option for medical facilities?

Innovations in solar panel efficiency and durability are improving the economic viability of solar energy solutions in healthcare. Implementing solar energy systems in medical facilities faces challenges such as high upfront costs, limited space for solar panel installation, and regulatory barriers.

Can medical facilities use solar energy?

By incorporating solar energy solutions, medical facilities can reduce costs, promote sustainability, and enhance energy resilience. Solar energy has been adopted in medical facilities for several decades. The adoption of solar energy in healthcare can be traced back to the 1970s during the oil crisis when alternative energy sources were explored.
