Overview

How much roof space does a 10kW Solar System need?

You will need between 440 and 475 square feet of roof space to accommodate a 10kW solar system. Depending on where you live, a 10kW solar system will produce anywhere from 11,000 to 15,000 kWh per year, which is enough to cover the average American home's annual energy consumption.

How long does a 10kW Solar System last?

The average payback period for a 10kW system can be anywhere from 8 years to 20 years, depending on where you live. Your location impacts how much your system costs, how much electricity the system produces, and how much the system will save you - all factors that influence the payback period.

What is a 10kW Solar System?

You might also see a 10kW solar panel system referred to as a 10kWp (kilowatt peak) system. In this context, there's no difference between the two. How many solar panels are in a 10kW system?

The number of solar panels in a 10kW system depends on the power rating of the panels themselves.
