

## EQACC SOLAR

# 1MWh energy storage project investment

## Highvoltage Battery

## Overview

---

What is a 1MWh energy storage system?

The 1MWh Energy Storage System consists of a Battery Pack, a Battery Management System (BMS), and an AC Power Conversion System (PCS). We can tailor-make a peak shaving system in any Kilowatt range above 250 kW per module. For applications over 1MW these units can be paralleled. Features: Features of the Battery Management System (BMS):.

Is a 1MWh battery energy storage system a good investment?

Introduction: The 1MWh Battery Energy Storage System (BESS) is a significant investment that requires careful consideration of various factors to ensure optimal performance and return on investment.

How can a 1 MWh energy storage system be expanded?

With a 1 MWh energy storage system as a unit, it has wide applicability and can expand capacity by combining multiple units in parallel, which has a good competitive advantage and can also be connected to new energy sources or connected to the grid as a distributed power source of smart grid.

What are the revenue streams for a 1MWh Bess?

The revenue streams for a 1MWh BESS can include energy arbitrage, peak shaving, demand response, and grid services. Energy arbitrage involves buying electricity when prices are low and selling it back to the grid when prices are high. Peak shaving reduces the peak demand on the grid, resulting in lower electricity bills.
