## Overview

---

What is a 3 kW solar system?

3 kW Solar is the new 4 kW solar system. Why?

3.9 kW is the largest system configuration available on a 3 kW inverter, generating a similar energy yield to a 4 kW solar system while better adapting to certain connection limitations. Choose a 3 kW solar energy system that suits you.

What is a 20kW Solar System?

A 20kW solar system is a type of solar power system that typically has a capacity of 2400units per month. A solar system is usually paired with the 50-60 solar system which can be mounted on rooftops or ground mount systems. There are mainly three types of solar systems which are available in the Indian market.

What is s6-eh3p (12-20)K-H series energy storage inverter?

S6-EH3P (12-20)K-H series three-phase energy storage inverter, suitable for large residential and small commercial PV energy storage systems.

What is an off grid solar power system?

Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.
