230 watts of solar power

Overview

How many Watts Does a solar panel produce?

Solar panel power output can get confusing fast. Is 400 watts good?

420 watts?

Should you opt for the 450-watt panel?

Is it worth the extra cost?

About 97% of home solar panels installed in 2025 produce between 400 and 460 watts, based on thousands of quotes from the EnergySage Marketplace.

How many Watts Does a solar panel produce in 2025?

About 97% of home solar panels installed in 2025 produce between 400 and 460 watts, based on thousands of quotes from the EnergySage Marketplace. But wattage alone doesn't tell the whole story. In fact, efficiency matters more than wattage when comparing solar panels—a higher wattage can simply mean that a panel is larger.

How much power does a home solar panel produce?

About 97% of home solar panels included in EnergySage quotes today have power output ratings between 400 and 460 watts. The most frequently quoted panels are around 450 watts, so we'll use this as an example.

How much energy does a 400 watt solar panel produce?

A 400-watt panel can generate roughly 1.6-2.5 kWh of energy per day, depending on local sunlight. To cover the average U.S. household's 900 kWh/month consumption, you typically need 12-18 panels. Output depends on sun hours, roof direction, panel technology, shading, temperature and age.
