3 2v solar container energy storage system

Overview

What is container energy storage battery ESS integrated system?

3.29MW Container Energy Storage Battery ESS Integrated System This Energy Storage System is highly integrated with lithium battery, battery management system, PCS, grounding system, power distribution system, temperature control system and fire protection system.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What is energy storage system?

This Energy Storage System is highly integrated with lithium battery, battery management system, PCS, grounding system, power distribution system, temperature control system and fire protection system. The AC voltage is 1305VDC, which can provide peak and valley filling, grid frequency adjustment, power expansion and backup.
