What is a photovoltaic-Storage Integration Project?

**Photovoltaic-Storage Integration Projects - Promoting Renewable Energy Utilization** Combining photovoltaic (PV) systems with ESS forms an integrated energy supply system that maximizes solar energy utilization and storage.

What is a residential energy storage system?

Our residential energy storage systems allow homeowners to store the energy produced by their solar panels during the day and use it at night or during periods of low sunlight. With our energy storage systems, residents can reduce their dependence on the grid and enjoy greater energy independence.

What is PV+ storage?

In addition, the PV+ storage model brings more flexibility and facilitates the emergence of innovative business cases in the photovoltaic storage sector. The combination of different devices and virtual power plants (VPP) is bringing more value creation to the domestic energy storage market.

What is commercial complex energy storage?

**Commercial Complex Energy Storage - Enhancing Customer Experience and Sustainability** Commercial complexes encompass shopping malls, office buildings, and hotels, each with diverse energy requirements. C&I ESS can be tailored to meet these varied needs, ensuring precise energy dispatch and high-efficiency usage.
