

EQACC SOLAR

40-foot solar-powered container manufacturer for farms

Overview

Developed by Freight Farms—the company that created the world's first container farm—the Greenery packages the most advanced indoor growing technology into a modular 40-foot shipping container. What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

What is a 20 & 40 ft shipping container?

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats.

What is a vertical farming container?

Available in 20-foot and 40-foot shipping containers. Vertical farming container is fully customized to customer's needs based on proven technology. SQUARE m² (Square Meter) Fodder farm container allows farmers to grow livestock feed on site. Fodder is a nutrient-dense hay that's used as a dietary supplement for cows, pigs, horses, sheep & chicken.
