## Overview

---

What is 5G power & iEnergy?

Fully meet the requirements of rapid 5G deployment, smooth evolution, efficient energy saving, and intelligent O&M. Including: 5G power, hybrid power and iEnergy network energy management solution. 5G power: 5G power one-cabinet site and All-Pad site simplify base station infrastructure construction.

What is a 5G solar power platform?

Hybrid power: On the basis of 5G power platform, solar power is smoothly introduced. In areas with good grid, the solutions upgrade smoothly among grid, solar hybrid and pure solar power to achieve low-carbon and zero-carbon.

What are the advantages of a 5G enclosure system?

6. Enclosure system is streamlined for 5G applications, offering features and functionalities that meet every customer's needs during the construction of a radio site, with the lowest total cost of ownership on the market. 7.

Why should you build a high capacity 5G site?

And building a high capacity 5G Site with a heightened degree of reliability means ensuring that site infrastructure meets a whole series of stringent requirements. Across the globe, Communication Service Providers are recognizing the benefits of Ericsson's new site solutions in delivering 5G to their subscribers.
