# 500 square meters solar panel price

## Overview

---

How much does a solar panel cost per square meter?

These incentives effectively lower the price per square meter of a solar panel system, making it more affordable for individuals and businesses. The price per square meter of a solar panel can vary depending on several factors. Generally, residential solar panel systems cost around \$1,500 to \$3,000 per square meter.

How much does a 30m<sup>2</sup> solar PV system cost?

A residential property in an urban region of South Africa installs a 30m<sup>2</sup> solar PV system featuring mid-range monocrystalline panels. The solar panel cost per square meter, including all labor and system components, is approximately \$6,000.

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time.  $\text{Net cost of the system} / \text{lifetime output} = \text{cost per kilowatt hour}$ .

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system – and neither is living space, for that matter.
