500MW of solar energy in East Africa

Overview

Is AMEA power launching a 500MW solar PV plant in Egypt?

AMEA Power signed the Power Purchase Agreement and Land Agreement for an additional 500MW Wind Project in Egypt. Aswan Governorate, Egypt, 14 December 2024 – AMEA Power, one of the fastest growing renewable energy companies in the region, announced today, the commissioning of its 500MW Abydos Solar PV Plant in Egypt.

What is the biggest solar PV project in Africa?

The first, a 1,000MW solar PV with a 600MWh battery energy storage system (BESS), which will be the largest project of its kind in Africa, once commissioned. The second, a 300MWh BESS, which is an extension of the company's existing 500MW Abydos solar PV plant. The project will pioneer the first-ever use of a utility-scale BESS solution in Egypt.

What's happening with Africa's largest grid-connected PV project?

Also of significance is the news that one of Africa's largest grid-connected PV project, the 500MW Abydos Solar PV Plant, has been successfully completed through the collaboration of AMEA Power, CEEC, and JA Solar, with JA Solar supplying all PV modules for the project.

Does Africa still have solar power?

While the spread of solar energy across Africa is encouraging, a significant concentration of capacity persists. In 2024, 78 per cent of all new installations were concentrated in just two countries — South Africa and Egypt.
