

## EQACC SOLAR

# 500kW Photovoltaic Container for Farms in East Africa

## Overview

---

Can agrivoltaic energy be generated in East Africa?

The abundant solar radiation reaching East Africa (4-7 kWh/m<sup>2</sup>/day) offers substantial potential for photovoltaic electricity generation. Diagrams of the agrivoltaic system at Latia Farm, Kenya. (a) Layout of agrivoltaic plot and the open-field control plot. (b) Side profile of a section system.

Can distributed solar photovoltaic systems increase EA agricultural productivity?

To increase EA agricultural productivity by improved energy access, distributed solar photovoltaic (PV) systems have been promoted as a possible solution, particularly addressing the need to increase yields through irrigation

How does solarnow work in East Africa?

SolarNow operates in East Africa, providing high-quality solar home systems and solar water pumps designed for households and agricultural use. Their financing options enable farmers to access solar energy solutions that improve irrigation and productivity.

Can solar energy improve livelihoods in East African agricultural communities?

This work was funded by the ESRC through UKRI's Global Challenges Research Fund and forms part of a collaborative project entitled "Harvesting the sun twice: Enhancing livelihoods in East African agricultural communities through innovations in solar energy" led by the University of Sheffield (PI Prof S Hartley; ES/T006293/1).
