

EQACC SOLAR

5MW Solar Containerized Container for Agricultural Irrigation in Reykjavik

Modular design,
unlimited combinations in parallel

BUILT-IN DUAL FIRE PROTECTION MODULE

Overview

Can solar-powered irrigation be used in agriculture?

In the agricultural sector, solar-powered irrigation can be particularly successful to overcome the frequently occurring energy shortages causing disruption of supply needed for lifting and distributing irrigation water. Challenges, however, remain in the monitoring and governance of abstraction through water pumping systems.

What is a grow solar container farm?

The Grow Solar shipping container farms make it possible to grow delicious food 365 days a year with thousands of high-value crops like lettuces, leafy greens, herbs, roots, edible flowers, and more in just 320 sq. ft. Grow Solar Container Farm complexes are designed for all aspects of the cultivation process.

What is container farming?

Container farming is a vertical farming system that uses modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment that is ideal for growing crops, providing a solution for sustainable agriculture in small spaces.

Are solar powered irrigation systems a viable alternative energy source?

Solar powered irrigation systems (SPIS) provide reliable and affordable energy, potentially reducing energy costs for irrigation. Particularly in rural areas, where cost of diesel fuel is high or where reliable access to the electricity grid is lacking, they can provide a relatively flexible and climate-friendly alternative energy source.

5MW Solar Containerized Container for Agricultural Irrigation in Rey

Solar Shipping Container for Remote Agriculture

Solar shipping container powers irrigation and tools in off-grid farms. Ideal for remote agriculture needing clean, mobile energy.
