# **5MWh Mobile Energy Storage Container Used at West African Airports**

## Overview

---

What is 5 MWh utility storage?

The 5 MWh Utility Storage represents the latest and most advanced in the Utility Storage family of products with the highest energy density and enhanced features such as a wider operating temperature range than its predecessors.

What is a 5 MWh battery?

5+MWh capacity□optimized for utility scale application, ensuring peak shaving and grid stability. Features 314Ah LFP battery cells, 20ft standard container design, high energy density, and multi-level safety. High corrosion-resistant and compliant with global environmental standards.

What is Aceon energy storage?

AceOn offer one of the worlds most energy dense battery energy storage system (BESS). Using new 314Ah LFP cells we are able to offer a high capacity energy storage system with 5016kWh of battery storage in standard 20ft container. This is a 45.8% increase in energy density compared to previous 20 foot battery storage systems.
