

**EQACC SOLAR**

# **5g containers can be deployed using micro base stations**

## Overview

---

The increasing energy consumption is a legacy of the fast improvement of ICT (Information and Communication Technology). It is also contrary to the current energy conservation and emission reduction con.

How to optimize base station deployment in 5G wireless networks?

In previous research on 5 G wireless networks, the optimization of base station deployment primarily relied on human expertise, simulation software, and algorithmic optimization.

What is a 5G deployment scheme & cooperative operation?

A deployment scheme and cooperative operation for optimizing the location of 5G macro and micro base stations under the considerations of both the cost and signal coverag. References is not available for this document.

What is 5G & how does it affect a communication system?

The construction of the 5G network in the communication system can potentially change future life and is one of the most cutting-edge engineering fields today. The 5G base station is the core equipment of the 5G network, and the performance of the base station directly affects the deployment of the 5G network.

Will 5G grow in 2024?

Strategy Analytics predicts an explosive growth of emerging 5G networks. They forecasted the number of new base station sectors deployed to double between 2018 and 2024. This rapid 5G growth will result in equipment for nearly 9.4 million new and upgraded wireless base stations deployed by 2024.

## 5g containers can be deployed using micro base stations

---

### China Telecom Builds First 5G Micro Base Station Using

Dense layers of micro base stations can increase the 5G network coverage area and also provide adequate coverage in areas where the 5G signal from macro base stations ...
