

## EQACC SOLAR

# 5g outdoor communication cabinet base station

## Overview

---

What is a 5G outdoor integrated cabinet?

5G Outdoor integrated cabinet is well suited for power equipment, batteries, telecom gear, all integrated into a robust, economical package. The cabinet contains internal mounting rails, which allow installation of standard 19" equipment. Lockable front door with rubber seal ,with AC or DC Air conditioner mounted on the door Support custom-made.

How can a 5G base station be truly global?

To develop truly global 5G coverage, base stations will need to be installed across the world in some extremely inhospitable environments. This means that the new generation of base stations needs to be designed with environmental challenges and extreme weather in mind, such as the effects of humidity, heat and wind.

Should a 5G base station be able to withstand a hot climate?

Both the 5G cells and the base station should remain functional even when subjected to severely wet and humid conditions. Even in extremely hot climates, 5G components must remain reliable, stable and energy efficient to prevent downtime, malfunctions and reduction in lifespan.

What is a 5G enclosure?

Equipment protection: An enclosure's primary purpose is to protect 5G cables and equipment from damage caused by environmental and physical conditions. The cabinet is mechanically robust and sealed, preventing costly damage from weather conditions, impacts and other factors.
