

## EQACC SOLAR

# 700mwh battery energy storage installed capacity enterprise

## Overview

---

What is the capacity of the world's largest vanadium flow battery?

It has a capacity of 175 MW/700 MWh. On Decem, Rongke Power (RKP) completed the installation of the world's largest vanadium flow battery . With a capacity of 175 MW and 700 MWh, this innovative energy storage system, located in Ushi, China, sets a new standard in long-duration energy storage solutions.

How much energy storage does China have in 2023?

By the end of 2023, China had completed and put into operation a cumulative installed capacity of new type energy storage projects reaching 31.4GW / 66.9GWh, with an average storage duration of 2.1 hours. The newly added installed capacity in 2023 was approximately 22.6GW / 48.7GWh, which is three times that for 2022 (7.3GW / 15.9GWh).

How much power battery is used in electric vehicles?

The figures indicate that the total battery application in electric vehicles (EVs, PHEVs and HEVs) worldwide reached approximately 510.1 GWh, marking a 21.7% year-on-year increase. Amid rising demand for new energy vehicles, installed capacity for power battery has shown impressive growth this year.

Which Chinese companies lead the global power battery market?

In terms of rankings, six Chinese companies led the market: CATL, BYD, CALB, EVE Energy, Gotion High-Tech, and Sunwoda, with a combined installed capacity of 332.3 GWh, accounting for 65.1% of the market share, highlighting the significant position of Chinese companies in the global power battery market.
