80 battery cabinet UPS installation

Overview

How do I install an Eaton external battery cabinet?

When installing Eaton external battery cabinets (EBCs), refer to the manufacturer's installation manual. If installing a customer-supplied battery system, install the battery system according to the battery and battery system manufacturer's instructions and all the applicable codes and regulations. Cable entry to the UPS is at the rear of the UPS.

Is there a DC disconnect device within the ups for external batteries?

NOTE: There is no manual DC disconnect device within the UPS for external batteries. Install batteries in accordance with the battery and battery system manufacturer's instructions. Before scrapping UPS or its battery cabinet, remove the battery bank. Follow local requirements in battery recycling or discard.

How to connect a battery cabinet to a ups?

Use red cable for Battery+ polarity and black or blue cable for Battery - polarity. Connect the input neutral line directly to the input "N" terminal. There are protective earthing terminals within the UPS for mains supply, load supply and battery. The battery cabinet earth connection shall be connected to the earthing terminal within the UPS.

How many batteries does a ups have?

The UPS can be equipped with up to 4 external battery cabinets (EBCs) containing valve-regulated lead-acid (VRLA), maintenance-free batteries. The UPS has 32 batteries per string, if using internal batteries. A single EBC can contain 32-40 batteries per string. Power and control wiring are not supplied with the UPS.
