

## EQACC SOLAR

# A solar container communication station inverter was found on the roof

## Overview

---

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Can solar containers be used for emergency backup power?

Emergency backup power: Showcase the usefulness of solar containers during power outages, particularly in critical facilities like hospitals, data centers, and emergency response centers. Event or construction site power banks: Emphasize the convenience and eco-friendliness of solar containers as mobile power sources for temporary setups.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

How can solar containers be used to power off-grid locations?

Multifunctionality: Discuss how solar containers can power various applications, making them a versatile energy solution. Remote power for off-grid locations: Highlight the ability of solar containers to provide electricity to remote communities, mining sites, and oil rigs without extensive infrastructure.
