

EQACC SOLAR

After-sales service for high-voltage solar-powered containerized solar panels used in chemical plants

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How does solar energy logistics work?

Using our global network of air and sea carriers, we design a solar energy logistics solution that transports your solar panels or solar panel components efficiently and safely to their destination.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

After-sales service for high-voltage solar-powered containerized sol

Solarcontainer: The mobile solar system

Mounted on this frame is the innovative PV rail system and the clever folding mechanism of the solar panels, which enable the transport dimensions and lifting points of a ...

[Get Price](#)

Containerized Lithium Battery Energy Storage 100kwh ...

with excellent teams that focus on product development, design, quality control, inspection and after-sales for making sure every piece solar goods have a good performance and every ...
