

EQACC SOLAR

Airport photovoltaic container wind-resistant type

Overview

What are the different types of solar energy used in airports?

By focusing on solar collectors, solar photovoltaic (PV), wind energy, wave energy, tidal energy, hydro energy, and geothermal energy, this study aims to comprehensively understand their characteristics, practical uses, and potential advancements in airport settings.

Can a mobile energy container be used to charge electric vehicles?

An innovative system for sustainable energy generation is currently in use at Munich Airport: a container with photovoltaic panels and wind rotors from FlowGen, a company specializing in green energy system solutions. In cooperation with Munich Airport, the mobile energy container is being used to charge electric vehicles.

How many photovoltaic panels will be installed at Vienna airport?

,000 photovoltaic panels this plant will be Austria's largest ground-mounted plant. After commissioning in spring 2022, the photovoltaic plants at the Vienna Airport site will generate an output of around 30 million kilowatt hours of solar power per year, and thus will cover around 30 per cent of Vienna Airport.

Where is the energy container located?

The energy container is located in a parking lot used by car rental companies on the east side of the airport. There, newly delivered rental cars will be charged using energy generated by three small wind turbines and photovoltaic panels.

Efficient
Higher Revenue

Intelligent
Simple O&M

Flexible
Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High-Power Modules
- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- ATCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
