Airport uses 25kW New Zealand collapsible container

Overview

Will air New Zealand operate a cargo-only service?

The airline will initially operate a cargo-only service in partnership with NZ Post. Wellington Airport will be the home base of Air New Zealand's first next-generation aircraft, while Marlborough Airport will also establish charging infrastructure to power the aircraft for the return journey.

How much cargo can Air New Zealand carry?

The conventional take-off and landing (CTOL) Alia CX300 is designed by US-based BETA Technologies and will carry up to 0.56 tonnes of cargo per flight. The aircraft is due for delivery in 2026 and will be used by Air New Zealand to carry cargo between Wellington and Blenheim through its partnership with New Zealand Post.

Does Auckland have an electric empty container handler?

Port of Auckland and Wellington's CentrePort have each been approved co-funding of \$500,000 towards procuring an electric empty container handler (ECH), as well as associated on-port charging infrastructure.

Can electric empty container handlers help reduce New Zealand's ports' emissions?

The country's first electric empty container handlers are set to support lowering New Zealand's ports' emissions. New electric empty container handlers promise to play a key role in decarbonising two of New Zealand's largest ports, in the latest round of successful applications from EECA's Low Emission Transport Fund (LETF).
