Algeria adds new power base station

Overview

How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

Which power plants are being built in Algeria?

Combined Cycle Power Plants: Biskra and Bellara Algeria's electricity generation capacity is set to grow with the construction of two major combined cycle power plants: Biskra and Bellara. Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW.

What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at increasing natural gas production, expanding electricity generation and enhancing renewable energy capacity.

What is Algeria's first photovoltaic project?

Among them, the 233-megawatt photovoltaic project completed in 2016 was Algeria's first new energy project and also the first large-scale grid-connected photovoltaic power station project in Africa. It was honored with the Luban Prize for Overseas Projects in 2018-2019.
