Overview

Are solar panels worth it?

Solar panels make financial sense for most homeowners, but certain conditions maximize your return on investment. Here's when solar is typically worth it: Solar panels are a long-term investment that generate free electricity for 25-30 years. If you own your home, you'll capture all those benefits.

Are solar panels cheaper in 2025?

In 2025, solar panels are cheaper and more efficient than ever! Solar panels becoming more affordable will be a key player in the expansion of residential solar, contributing to the combat against climate change - and higher efficiency ratings can help keep costs down and guarantee customers will be getting the best outcomes possible!.

Are solar panels a good choice?

Solar panels offer a clean and sustainable way to generate electricity, providing long-term savings and energy independence. In this section, we'll explore the key advantages that make solar energy a smart choice for homeowners and businesses alike. How much do solar panels save?

Let's do the math.

How much will solar panels cost?

Without solar panels, the average EnergySage shopper will pay about \$87,000 in electricity bills over the next 25 years, according to EnergySage data. If you install solar panels now at an average cost of \$29,649 before any incentives, you'll save about \$57,000 over the next two and a half decades.
