Overview

How are solar panels shipped?

Most solar panels are shipped via 20ft or 40ft containers. Depending on the quantity, you may choose between FCL (Full Container Load) or LCL (Less than Container Load). FCL: If you are importing a large number of solar panels, booking a full container is cost-effective and provides better security for your goods.

Is freight shipping necessary for solar panels?

Solar panels often require freight shipping services due to their oversize dimensions and the need for careful packaging. Freight shipping solar panels involves protecting the fragile cargo from damage during transit and ensuring careful and on-time delivery. It takes the right freight partner to ensure solar panels are transported safely.

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which what we ended up doing for him. (See in image with tan container.).

How does a shipping container solar lighting system work?

The shipping container solar lighting system is very simple and maintenance free. The 12V battery provide power to the LED lights and the solar panel provide power to the battery through the charging controller. Need a shipping container solar lighting?
