# **Are there any BESS outdoor power supplies in Central Africa**

## Overview

---

Is Bess a viable power system for Africa?

The African Continental Power System Masterplan (CMP) study into BESS says that considering Africa's rapidly growing power requirements and the already planned contributions from variable renewable energy (VRE), these commitments do not fully reflect the potential for BESS on the continent.

Are battery energy storage systems developing in Africa?

Confirmed development of Battery Energy Storage Systems (BESS) across Africa is still small compared to global projections, says a study. The confirmed development of Battery Energy Storage Systems across Africa is still small compared to global projections – less than 0.5% of the global BESS capacity of 358GW by 2030.

Which energy sources can charge Bess?

Various energy sources like gas, nuclear, wind, and solar can charge BESS, making it crucial for stabilising grids and enhancing renewable energy reliability. Eskom's BESS investment aligns with grid enhancement, renewable energy integration, and resilience goals, offering a versatile solution for improved performance and sustainability.

How much energy does a Bess site hold?

A BESS site with a capacity of 200 MW/800 MWh holds a substantial amount of stored energy. This is loadshedding?

equivalent to a single unit at Medupi Power Station running for an hour.
