

**EQACC SOLAR**

# **Are there hybrid energy solar container communication stations in New Zealand**

## Overview

---

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island. Paris, Janu-Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

How important are battery energy storage systems to New Zealand's electricity supply?

Battery energy storage systems are set to play an increasingly important role in New Zealand's electricity supply.

Will a 100-megawatt solar farm improve New Zealand's national grid?

Located at Ruakākā in the country's North Island, the 100-megawatt (MW) BESS will improve the stability of the national grid, as intermittent renewable power generation increases in New Zealand. The BESS is the first stage of a project that will include the construction of a co-located 130 MW solar farm by Meridian Energy.

How is electricity transported in New Zealand?

Electricity is transported at high voltage (up to 220,000 volts) through a high-voltage alternating current system around New Zealand. To transfer electricity between the North and South Island, there is a high-voltage direct current (HVDC) inter-island cable with a transmission line under the Cook Strait.
