

**EQACC SOLAR**

# **Australia's 10kW Mobile Energy Storage Container**

## Overview

---

Why should you choose a container energy storage system?

Housed in durable shipping containers, our systems are engineered to meet the growing demand for renewable integration, backup power, and off-grid energy supply. Why Choose a Container Energy Storage System?

All-in-One Power Solution – Integrated battery storage, inverter systems, and control units in one secure container.

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

What is a containerised battery unit?

Containerised Battery Units: Built into secure, weather-resistant containers, these BESS systems are engineered for high-capacity, industrial-scale power storage. Perfect for construction, mining, or backup for critical infrastructure, containerised solutions are scalable and robust, suitable for long-term and remote applications.

What is a 1MW battery storage unit?

Larger, 1mW units, utilise lithium-ion technology and have a number of battery protection features, from smart battery management systems (BMS) to built-in HVAC. How does battery storage work?

## Australia's 10kW Mobile Energy Storage Container

---

### CAPS Energy Storage Systems

The CAPS BESS is an efficient, reliable, and smart containerised Battery Energy Storage System (BESS). It is designed to provide backup power, intelligent energy storage management, and ...
