Automatic Folding Container for Airports in North Asia

Overview

What are Air Cargo Systems?

AIR CARGO Systems and individual components for cost-eficient transportation, storage and build & break of unit load devices and consignments. ULD HANDLING Autonomous and intelligent transportation of ULDs with automated guided vehicles. Intelligent solutions for eficient baggage sorting and process-reliable loading of baggage in ULDs.

Who is Daifuku airport technologies?

Daifuku Airport Technologies is a trusted partner of airports and airlines globally, providing end-to-end solutions. We provide Baggage Handling Systems, Operations & Maintenance, Passenger Screening Lanes, and Airport Operation Systems.
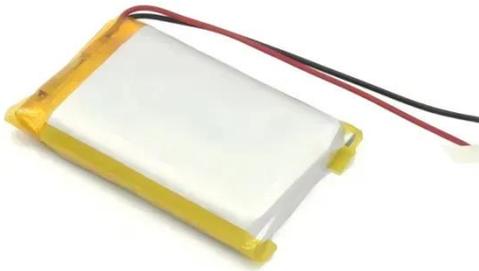

How will ai transform baggage handling?

In summary, AI is turning baggage handling from an opaque process into one that's communicative and customer-centric. Improved Customer Transparency: A traveler viewing a smartphone app that displays their suitcase's live location on a map of the airport.

What is a fully automated cargo terminal?

As integral element of fully automated cargo terminals, our new AGVs provide the link between import/export areas and build & break workzones as well as automated storage and retrieval systems. In manual terminals, they can enable cargo handlers to take the first step towards the benefits of automation.
