

**EQACC SOLAR**

# **Avaru City Lighting Folding Container 20 feet**

## Overview

---

Because shipping containers are long, narrow, and have relatively short ceilings, we recommend a surface mount fixture. Linear strip fixtures are ideal as they will lighten up a larger area and the light will be gene.

How do I choose the right lighting for shipping containers?

Selecting the right lighting for shipping containers involves more than just achieving adequate illumination—it's about enhancing efficiency, optimizing energy use, and ensuring comfort.

What is the best light for shipping container lighting?

LED technology emerges as the best option for shipping container lighting, offering superior efficiency, minimal heat emission, excellent brightness, and easy installation.

How many fixtures do you need for a 20 ft container?

20-foot containers require 2-3 fixtures for general storage or 3-4 for detailed work applications. 40-foot containers need 4-6 fixtures for storage use or 6-8 for workspace applications. Position fixtures evenly along the container's length to eliminate shadows and ensure consistent illumination throughout the space.

What are the challenges in shipping container lighting?

One of the major challenges in shipping container lighting is managing heat emission. In such compact spaces, excess heat can quickly affect comfort and safety. Traditional lighting solutions, like incandescent bulbs, tend to emit significant amounts of heat, which can lead to an uncomfortable environment and higher cooling demands.
