What is a battery management system?

A battery management system monitors and ensures the safe operation of batteries, crucial for preventing accidents like ignitions, electric shocks, and explosions. Also known as a battery management unit (BMU), this technology is gaining prominence with the rise of smartphones and the shift towards electric vehicles (EVs).

What is a BMS power converter?

The BMS ensures safe and optimized battery performance, while their power converters facilitate energy conversion and distribution. These products find applications in electric transportation, residential and commercial solar installations, grid stabilization projects, and industrial energy management.
