

**EQACC SOLAR**

# **Balcony wall mounted solar power generation system**

## Overview

---

How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!.

Why should you choose a balcony PV system?

Balcony PV system avoid these restrictions, and make better utilization of space. Especially for tenants, its rapid installation and disassembly are more convenient. By using a small plug-in solar power plant, you can produce your own solar power and be a model towards climate protection and energy transition!.

Is balcony solar off-grid?

If you want to brag about your new "Balcony Solar" install, it's true that any device connected to the power station is "off-grid". If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!.

Will a balcony Solar System run my apartment?

At its core, balcony solar ("balcony power plant" or "plug-in solar") refers to a compact photovoltaic system designed for apartments, condos, and urban spaces—making clean energy truly accessible. But let's be honest: a balcony solar system will not run your entire apartment. Balcony solar kits are best thought of as "solar appliances."
