

**EQACC SOLAR**

# **Banjul Solar Fan**

## Overview

---

What is a solar fan?

Okay so here's what a solar fan actually is: Solar fans are these super innovative cooling devices powered completely by solar energy. They convert sunlight into electricity using photovoltaic cells, making them eco-friendly and cost-effective.

Are solar fans eco-friendly?

Solar fans offer a refreshing alternative, using the sun's abundant energy to power cooling and ventilation systems. These eco-friendly devices offer a practical and sustainable solution for homes, businesses, and outdoor spaces, ensuring comfort without incurring environmental costs.

Are solar fans transforming the way we stay comfortable?

Let's dive into the world of solar fans and discover why they're transforming the way we stay comfortable. Solar fans are innovative devices that harness solar energy to provide cooling or ventilation. By capturing sunlight through photovoltaic panels, these fans generate electricity to drive air circulation, eliminating the need for grid power.

What is a solar fan controller system?

Controller System: A regulator ensures smooth power flow between the panel, battery, and fan, optimizing performance. This simple design allows solar fans to serve a wide range of purposes, from cooling homes to ventilating agricultural or commercial spaces.
