# Base station adds power module

## Overview

---

How big is a 5g-advanced base station module?

The compact module measures only 12.0mm x 8.0mm (prototype) thanks to the high-density mounting of components, which will enhance the installation efficiency of 5G-Advanced base stations. Going forward, Mitsubishi Electric will continue research and development aimed at the practical application of the PAM in 5G-Advanced base stations.

What is a base load power station?

During periods when there is no peak power demand, there are some power stations that constantly run and provide power to the grid, known as base load power stations. Nuclear power stations fall into this base load power station category. These stations cannot be easily stopped or restarted.

Will a 5G power amplifier module be used in mmimo base stations?

TOKYO, Septem- Mitsubishi Electric Corporation (TOKYO: 6503) announced today that it will begin shipping samples of a new Gallium Nitride (GaN) power amplifier module for use in 5G massive MIMO1 (mMIMO) base stations on September 21. Power amplifier modules help reduce the power consumption of 5G mMIMO base stations.

What is a Doherty circuit based power amplifier module?

Mitsubishi Electric's original high-density packaging technique allows the realization of a Doherty- circuit-based power amplifier module that is indispensable to 5G base station power amplifiers.
