

**EQACC SOLAR**

# **Base station battery rack weight**

## Overview

---

What makes a telecom battery pack compatible with a base station?

**Compatibility and Installation** Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. **Modular Design:** A modular structure simplifies installation, maintenance, and scalability.

What is a LiFePO4 rack battery?

This rack battery solution features a robust battery rack structure that supports flexible deployment for homes, telecom stations, and solar energy systems. Each lifepo4 rack battery module is easy to install and maintain, forming a safe, high-efficiency HV battery bank. Ask about OEM/ODM services for lifepo4 rack battery solutions.

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO4) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What is a Himax battery?

HIMAX, a professional lithium battery brand, is committed to providing high-performance LiFePO4 battery solutions for global customers. Our 48V 100Ah LiFePO4 battery pack, designed specifically for telecom base stations, offers the following features:
