

## EQACC SOLAR

# Battery energy storage cabinet

## Overview

---

What is energy storage cabinet?

Energy Storage Cabinet is a vital part of modern energy management system, especially when storing and dispatching energy between renewable energy (such as solar energy and wind energy) and power grid.

What type of batteries are used in energy storage cabinets?

Lithium batteries have become the most commonly used battery type in modern energy storage cabinets due to their high energy density, long life, low self-discharge rate and fast charge and discharge speed.

How to design an energy storage cabinet?

The following are several key design points: Modular design: The design of the energy storage cabinet should adopt a modular structure to facilitate expansion, maintenance and replacement. Battery modules, inverters, protection devices, etc. can be designed and replaced independently.

How many kWh are in a battery storage container?

Each battery energy storage container unit is composed of 16 165.89 kWh battery cabinets, junction cabinets, power distribution cabinets, as well as battery management system (BMS), and the auxiliary systems of distribution, environmental control, fire protection, illumination, etc. inside the container; the battery container is 40 feet in size.
