Battery energy storage equipment in Cebu Philippines

Overview

Is Aboitiz Power Building a hybrid battery energy storage system?

Aboitiz Power Corp., through subsidiary East Asia Utilities Corp. (EAUC), has begun construction of a 30-megawatt hybrid Battery Energy Storage System (BESS) inside the Mactan Economic Zone in Lapu-Lapu City, Cebu. The project broke ground on Thursday, July 17, and is scheduled for commissioning by the first half of 2026.

Can advanced storage strengthen the Philippines' green energy system?

"Together with forward-thinking partners, we are ready to shape and strengthen a robust green energy system in the Philippines and Southeast Asia," he added. SUMEC Philippines General Manager Lennon Zong highlighted the role of advanced storage in the Philippines' clean energy journey.

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.

Why should we invest in energy storage in the Philippines?

"This energy storage project is not just another venture—it is a testament to our shared commitment to advancing clean energy in the Philippines. By integrating advanced storage technology, we are not only enhancing grid stability but also ensuring that renewable energy can be supplied reliably, day and night.
