

**EQACC SOLAR**

# Battery inverter only

## Overview

---

What is a battery inverter?

A battery inverter, also known as a DC to AC inverter, converts the direct current (DC) stored in a battery into alternating current (AC), which is the type of current typically used in homes, businesses and industry. Battery inverters are therefore essential for making use of stored solar power.

What type of batteries does this inverter support?

This inverter supports a flat plate, tubular, and SMF battery. It comes with an LCD and is backed by an intelligent 32 bit DSP processor. Moreover, it comes with a 6 water level indicator battery that requires minimum maintenance.

Do battery inverters convert 12V DC to 230V AC?

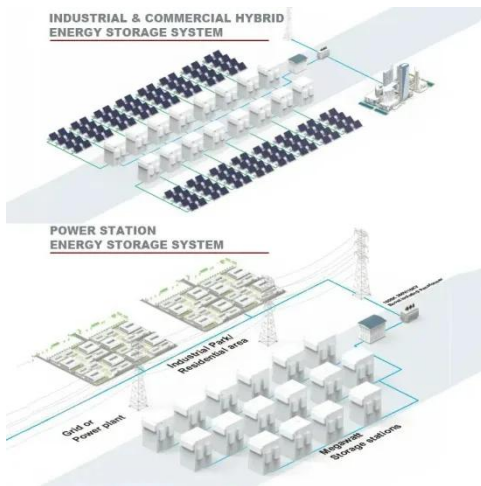

Battery inverters, converting 12V DC to 230V AC, play an important role in the operation of a PV system: PV systems generate direct current (DC) which must be converted into alternating current (AC) for use in homes, businesses, industry, and for feeding into the utility grid. This is the job of PV inverters.

Which is the best inverter battery?

The Luminous ILTT 18048N 150 Ah is considered one of the best inverter batteries. It offers trusted performance, satisfactory backup time, long life with fast charging, and high-performance constant power.
