Battery life of household battery energy storage

Overview

How long do home batteries last?

The expected life for home batteries is usually between 6,000 to 8,000 cycles. Similarly, you might see an expected energy "throughput" listed somewhere on your warranty. This is another way the manufacturer estimates your battery's lifespan.

Should you invest in home battery storage?

Whether you frequently experience outages, are paying exorbitant electric bills, or simply want more energy independence, investing in home battery storage may be the solution you're looking for. You don't need a home solar panel system to reap the benefits of home battery backup.

How long do battery storage systems last?

Let's take a look at the average lifespan of battery storage systems and how to maximise their life expectancy. When it comes to the longevity of battery storage systems, you can generally expect them to last between 10 and 12 years. That said, some premium models can keep going for up to 15 years or even longer with the right care and maintenance.

When did home storage batteries come out?

Large companies such as LG and Samsung began releasing lithium battery systems in 2015, but interest rapidly increased with the announcement of the Tesla Powerwall; this was when home storage batteries hit the mainstream.
