

EQACC SOLAR

Belarusian energy storage power station revenue

Overview

How many solar energy installations are there in Belarus?

287 solar heating installations with total heat capacity of 3.9 MW th. Hydropower resources in Belarus are deemed scarce, though there are opportunities for small hydro in the northern and central parts of the country.

What is the solar power potential of Belarus?

Solar power potential is significant, mainly in the south and southeast of the country. In terms of global horizontal irradiation (GHI) and direct normal irradiation (DNI), most of Belarus receives only 1 100 kilowatt hours per square metre (kWh/m²) to 1 400 kWh/m² of GHI, and around 1 000 kWh/m² of DNI.

Are there hydropower resources in Belarus?

Hydropower resources in Belarus are deemed scarce, though there are opportunities for small hydro in the northern and central parts of the country. Total hydropower potential is estimated at 850 MW, including technically available potential of 520 MW and economically viable potential of 250 MW (0.44 Mtoe/year).

Which technologies are deployed in Belarus?

All technologies currently deployed in Belarus are mature and have commercial status. The technology with the most mature local market is biomass, currently used mainly in heat generation.
