

**EQACC SOLAR**

# **Bess system for solar factory in Toronto**

## Overview

---

Who are the top 10 Bess manufacturers in Canada?

This paper will introduce the top 10 BESS manufacturers in Canada including TERIC Power, Northland Power, TransAlta, EVLO, Hecate Energy, Discover Battery, AltaStream, Westbridge Renewable Energy, Moment Energy, Huntkey, explore how they are leading the energy storage industry through innovative technology and service excellence.

How does a Bess work?

A Battery Energy Storage System (BESS), such as those offered by FusionSolar, works by storing energy in a rechargeable battery and releasing it back into the power grid during peak demand or when renewable energy sources are low. This process involves an inverter and sophisticated control software.

What is Bess technology & why is it important?

As the global energy market shifts to BESS, this sector is growing rapidly. Organizations and governments want BESS technology to cut carbon emissions. Energy storage is becoming essential. BESS allows renewable energy, such as solar and wind, to be stored for later use, helping meet peak demand and ensuring a steady energy supply.

What is a Bess project?

Pioneered and initiated several BESS portfolios in Canada. Develops most of Alberta's utility-scale BESS projects. Sturgeon Storage Project is a 23-megawatt lithium-ion battery energy storage system that will be independently connected to Alberta Connected Power System (AIES) and scheduled by Alberta Electric System Operator (AESO).
