Overview

What is a sunsynk 3 phase 50kW hybrid inverter?

The Sunsynk 3-Phase 50kw Hybrid inverter is a highly efficient power management tool that allows the user to hit those 'parity' targets by managing power flow from multiple sources such as solar, mains power (grid), and generators, and then effectively storing and releasing power as and when utilities require.

How efficient is a sunsynk inverter?

The CT coil measures the power and the inverter will reduce power when too much power is detected going to the grid. Even better, if the Sunsynk inverter only has 2000W of excess solar, the element will receive the other 200W from the grid. So it is efficient.

What is a sunsynk 16 kW inverter?

The SunSynk 16 kW inverter offers a complete single-phase solution and incorporates an inverter, charger and MPPT charge controllers. We have taken the Sunsynk Hybrid Inverter to the highest level. Our new Sunsynk MAX is the most powerful low-voltage inverter in the world, achieving a maximum output power of 16kW and battery charge current of 275A.

What is a sunsynk hybrid inverter?

Designed for easy installation and maintenance, the Sunsynk 50kW 3-Phase Hybrid Inverter will seamlessly integrate into your world to reduce costs, and provide reliable, renewable energy.
