Bidirectional charging of energy storage containers for Oslo base stations

Overview

What is a bi-directional charging system?

This shift is made possible by the cutting-edge bi-directional charging technology. Bi-directional charging allows EVs to function as mobile energy storage units. Equipped with this technology, EVs can not only draw power from the grid but also return electricity to it, or supply power to homes during peak demand or in the event of blackouts.

Can bi-directional charging be a Mainstream Energy Solution?

Sigenergy is proud to be among the first to successfully implement bi-directional charging in a commercial setting. In partnership with NIO, a leading EV manufacturer in China, Sigenergy has demonstrated the viability of bi-directional charging as a mainstream energy solution.

Does Helsinki need EV charging infrastructure?

The fourth presentation was given by Pekka Koponen (City of Helsinki) that spoke on the slow procurement processes for EV charging infrastructure deployment and no grid issues. The city owns the electric utility, and with 2030 climate goals, one-third of buses are electric. 10% of all parking needs to have EV charging capacity.

Does sigenergy offer bi-directional charging in the evdc?

While both the EVAC and EVDC provide crucial benefits to EV owners, Sigenergy has taken a bold step forward with the introduction of bi-directional charging in the EVDC, setting a new industry standard.

Bidirectional charging of energy storage containers for Oslo base st

Optimal Energy Transactions for Bidirectional Charging Stations

This paper proposes a novel control algorithm to use bidirectional charging of electric vehicles (EVs) in the framework of vehicle-to-grid (V2G) technology for optimal energy ...

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
