

EQACC SOLAR

Botswana flat-top solar power generation container

Overview

Does Botswana have a commitment to solar energy?

The commitment to solar energy is evident in the policies and frameworks that support the development of renewable projects. By integrating solar power into the national energy strategy, Botswana aims to foster a more resilient and sustainable energy future.

Will Botswana build a 100-megawatt solar plant?

Botswana has awarded a \$78.3 million contract to build a 100-megawatt solar plant to a consortium led by China Harbour Engineering Co. The project which is Botswana's second utility-scale solar facility is set to be completed in the second quarter of 2026.

Where is Scatec ASA building a solar power plant in Botswana?

In March, Scatec ASA began construction of a 100-megawatt solar power plant in Botswana's northeast. The initial 60 megawatts of this project are expected to come online by the end of this year. The Ministry of Minerals and Energy is also working on additional renewable energy projects.

How much does Botswana's solar project cost?

The project is a key development in Botswana's renewable energy sector, marking the country's second utility-scale solar facility. The contract which is valued at \$78.3 million includes partnerships with China Water and Electric Development Co. and local investors.
