

## EQACC SOLAR

# Build your own house for solar energy storage

## Overview

---

### Should you build your own Solar System?

Professional solar installations are getting more expensive, but you can build your own system for much less. Many people think solar setup is too complicated, but it's actually quite simple when broken into steps. This guide shows you how to choose and connect solar panels, batteries, a charge controller, and inverter in 7 easy steps.

### Should you build a solar battery bank?

Building a solar battery bank is essential for storing energy effectively in off-grid or backup systems. Whether you're powering a cabin, RV, shed, or prepping for emergencies, this guide walks you through each step. Start by calculating your daily energy consumption in watt-hours (Wh).

### How do I install a solar power system?

Structure: Secure batteries on a stable rack or enclosure. Wiring: Use correct gauge wire for your system's amperage. Safety: Install fuses, breakers, and disconnects. Connect solar panels → charge controller → battery bank → inverter. The charge controller prevents battery damage, while the inverter powers AC devices.

### Should you build your own solar power station?

Building your own solar power station isn't just a fun project—it's a smart investment in energy independence. Whether you're preparing for emergencies, powering an off-grid cabin, or upgrading your RV setup, this beginner-friendly system offers modularity, affordability, and flexibility.

## Build your own house for solar energy storage
